REWIREcable Forum 2024

The Premier Global Event for IT Professionals and Decision-Makers in the Wire & Cable Industry

Date & Venue

17th April 2024 | 10:00 AM - 3:00 PM
Messe Düsseldorf, Hall 10, Düsseldorf, Germany

Overview

Join us at the REWIREcable Forum 2024, the leading global event series dedicated to IT professionals and decision-makers in the wire and cable industry. This one-day forum offers a unique blend of networking opportunities, insightful presentations, and discussions on the latest technological advancements and strategies driving the wire and cable sector forward.

Agenda

[Last updated on 3/15/2024]

10:30 AM - Coffee Reception / Networking
Kickstart the event with an informal gathering, allowing attendees to meet and network over coffee.

11:00 AM - Welcome Speech
Albert Groothedde, CEO of InnoVites, will open the forum with a welcome address, setting the stage for a day of insightful discussions.

11:05 AM - Unlocking the IIoT Conundrum
Dennis Kolberg, Professor at TH Lübeck, Germany, delves into the complexities of IIoT projects, offering insights and a roadmap for successful implementation in continuous production environments.

11:35 AM - From Legacy to Innovation
Carlo Croci, CEO of Ramcro Special Cables, shares the transformative journey of Ramcro's ERP systems, highlighting the challenges, strategies, and benefits experienced through this digital evolution.

12:05 PM - Networking Lunch
A chance to mingle, discuss the morning's presentations, and form valuable connections over lunch.

1:00 PM - Leveraging Microsoft's Lead in AI
Manuel Möser, Managing Director at Cegeka, explores the integration of AI within the Dynamics 365 ecosystem, offering insights into the future of AI-led ERP solutions.

1:30 PM - Tailor Your Application Landscape
Sebastian Bersch, Director Manufacturing Cloud at Siemens/Mendix, introduces the concept of low-code solutions tailored to the wire & cable industry's unique needs, emphasizing the role of digital transformation.

2:00 PM - Advancements to Master Planning in CableERP
Albert Groothedde returns to discuss the latest developments in InnoVites CableERP, highlighting its impact on master planning in the cable industry.

2:30 PM - The Future of Drum Management: How Alesea uses IoT and AI to support the digitalization of the cable industry
Discover how Alesea, a leading player in the cable drum industry, is deploying technologies like IoT and AI to transform drum management - a critical aspect of cable logistics and operations.Briefly, we will begin introducing the Alesea solution focusing on hardware and software. We will then showcase a few customer success stories and finally close the speech with a quick live demo

3:00 PM - Event Closing notes
